

Applus+ Smog DADdy™

Applus Technologies Inc., a worldwide leader in vehicle inspections introduces Smog DADdy, the new Data Acquisition Device (DAD) for the California Smog Check program. When acquired as part of the Smog DADdy turnkey solution featured below, you will have everything you need to begin performing inspections and be fully BAR compliant. Smog DADdy is also available as a standalone solution.

Applus Smog DADdy System Features:

- BAR compliant OBD interface
- Available in wired or wireless versions
- Built-in device and cable self-test
- High-resolution 22" LCD monitor with sound
- Honeywell Industrial grade 2D barcode scanner
- Field-proven Okidata B411d laser printer
- Conventional 89-Key Windows Keyboard
- Windows PC with Ethernet, Wifi and Bluetooth connectivity
- Best-in-industry workstation with solid cast aluminum base
- Extended 24 month Smog DADdy factory warranty

Applus Smog DADdy Advantages:

- Smog DADdy wireless version eliminates dangerous cables in the inspection area
- All components are chosen to exceed stringent Applus+ standards for inspection environment reliability
- Comprehensive self-test capability ensures device and cable integrity
- Free lifetime firmware upgrades to meet future BAR requirements
- LED indicators showing power, OBD and PC communications status, in addition to vehicle voltage and fault conditions
- Comprehensive circuit protection maximizes Smog DADdy reliability
- Smog DADdy Manager software with enhanced OBD diagnostics
- Fast service support with remote diagnostics and **advance exchange warranty** to maximize uptime

Applus offers a complete menu of Smog DADdy solutions to meet the new BAR OBD Inspection Systems (OIS) requirements.
